

PR4.454-PR4.463 Precision Adjustable Combined Bearings

Precision eccentric-adjustable series identification and RFQ sheet.

Model	Execution	Verification
PR4.454	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.455	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.456	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.457	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.458	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.459	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.460	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.461	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.462	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing
PR4.463	Precision eccentric-adjustable	Confirm precision OD, eccentric range and current drawing

Verification notes

- Published family range: PR4.454-PR4.463.
- Plate-mounted versions require the complete AP drawing.

Before ordering, confirm the current controlled drawing, suffix, mounting geometry, load case, lubrication, temperature and inspection scope.
